/ LaserGas[™] II SP H2

NEO Monitors LaserGas[™] is using Tunable Diode Laser Absorption Spectroscopy (TDLAS) i.e a non-contact optical measurement method employing solid-state laser sources. The sensor remains unaffected by contaminants corrosives and does not require regular maintenance. The absence of extractive conditioning systems further improves availability of the measurements and eliminates errors related to sample handling. The monitor is mounted directly onto flanges, which include purge gas connections and a tilting mechanism for easy alignment. Continuous purge flow prevents dust and other contamination from settling on the optical windows. Once power and data lines are connected, measurements are performed in real-time.

Features

- Fast response time
- No gas sampling: In-situ measurement
- No interference from background gases
- Applicable for many process conditions
- Line measurement, integral concentration over the full stack diameter
- Integrated span check option
- Suitable for harsh environment
- No zero drift
- Stable calibration
- Continuous internal health check

Applications

LaserGas[™] II SP is designed for reliable and fast measurement of all kinds of gases in any environment, most typically:

- Chemical industry
- Petrochemical industry
- Metal industry
- NG processing
- Chlorine production
- Safety applications
- PVC production
- Process control
- Glass production

Customer benefits

- · In-situ monitoring
- Highly reliable real time analyzer
- Low maintenance cost
- Reduce emission to the environment
- Easy to install and operate
- Reduce daily operation costs
- Optimize process
- Well proven measurement technique

Technical data

Specifications Optical path length: Accuracy: Repeatability:	Typically 0.7- 4m Application dependet 2% of range (gas & application dependent)	Safety Laser class: CE: EMC:	Class 1 according to IEC 60825-1 Certified. Conformant with directive 2014/30/EU	Purge flow: Purge air quality:	Dry and oil-free pressurised air or nitrogen 10 - 50 l/min (application dependent) ISO 8573-1:2010, class 3 or better
Environmental condit * Certified operating temperature: Storage temperature:	ions -20 °C to +55 °C -20 °C to +55 °C	Approvals IECEx/ATEX zone 1:	ll 2 G Ex pxb [op is Ga] llC T4 Gb ll 2 D Ex pxb [op is Da] llIC T100°C Db	Maintenance Visual inspection: Calibration:	Recommended every 6 – 12 months Check recommended every 12 months
Protection classificatior Inputs / Outputs Analog output (3):	n: IP66 4 - 20 mA current loop (concentration, transmission)	IECEx/ATEX zone 2:	ll 3 G Ex nA nC [op is Ga] llC T4 Gc ll 3 D Ex tc [op is Da] lllC T100°C Dc	Validation:	Build-in cell for span check with H2 gas (non ATEX/IECEx/CSA) or integrated span check (all versions).
Digital output: Relay output (3):	TCP/IP, MODBUS, Optional fibre optic High gas, Maintenance Warning and Fault	CSA:	Class I, Div. 2, Groups A, B, C and D; Temperature Code T4	Dimension and weight Transmitter unit:	t 405 mm (plus 65 for purge unit) x 270 mm x 170 mm, 6.2 kg
Analog input (2): Ratings	4 – 20 mA process temperature and pressure reading	Installation and Oper Flange dimension alignment:	ation DN50/PN10 or ANSI 2"/150lbs (other	Transmitter unit: (Ex version)	405 mm (plus 65 for purge unit) x 270 mm x 310 mm, 7.9 kg
Input transmitter unit: 4 – 20 mA output: Relay output:	18 – 32 VDC, max. 20W 500 Ohm max. isolated 1 A at 30 V DC	Alignment tolerances:	dimensions on request) Flanges parallel within 1.5°	Receiver unit:	355 mm (plus 65 for purge unit) x 125 mm x 125 mm, 3.9 kg

* Certified ambient temperature range -20 °C to +55 °C Extended ambient temperature ranges; -30 °C to +55 °C or -20 °C to +65 °C (non-certified) availiable upon request, subject to application.

Gas	Detection limit (%Vol)	Min range (%Vol)	Max range (%Vol)	Response time (sec)	Max temp (°c)	Max pressure (BarA)
H ₂	0.1	0 -5	0 - 100	2	150	4

NOTE: Detection limits are specified as the 95% confidence interval for 1m optical path and gas temperature / pressure = 25 °C / 1 BarA. Measured in N₂.
